

Course Selection Worksheet Directions

1. If the course has the letter, E beside it that means it is an accelerated class and you must meet specific prerequisites to take the class.
2. If it says full year course then write the course name in both the Semester 1 box and the Semester 2 box.
3. When choosing Electives if it is a full year course write that course in both the Semester 1 box and the Semester 2 box.
4. When choosing Electives if it is a half year course, you must choose 2 half year courses. Write one in the Semester 1 box and the other in the Semester 2 box.
5. You may choose 2 more Alternative Electives in case your schedule does not permit you to be scheduled into your first choices.
6. If you are required to take a science with a lab, you will only be selecting 6 periods worth of class because 2 periods will be spent in science.
7. If you select a class that has an RTI lab with it, you will only be selecting 6 periods worth of class because 2 periods will be spent within this subject.
8. The order in which you wrote your classes within the boxes does not determine the actual period or semester you will be scheduled into the class. For example if you write PE second semester in the 8th box down, that does not necessarily mean you will be assigned to PE during 8th period second semester. It means that PE will be entered as a request within your schedule.
9. All students will be scheduled into a 30 minute study hall, therefore study hall **will not be** approved as an elective choice if: you have a science class that has a lab (3 days a week of the lab are used as study time) or if you qualify for early out. (Early out is your study hall time)

A list of Electives are attached has been added to the end of the sheet. Please refer to the online course selection guide for descriptions.

Senior Course Selection Sheet

Name: _____

<u>Course</u>	<u>Semester 1</u>	<u>Semester 2</u>
<u>English 12: Full yr course</u> <u>English 12 E: Full yr course</u>
